DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statements filed 2/9/2004 and 6/18/2004 have been considered.

Claim Objections

2. Claims 25-26 are objected to because of the following informalities: claim 25, line 1, "claim 25" should be --claim 24-- to be correction; and claim 26, line 1, "The outlet" should be --The apparatus-- in order to unify the claimed limitation. Appropriate correction is required.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 20-35 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,690,677 and claims

Art Unit: 2643

1-20 of U.S. Patent No. 6,549,616. Although the conflicting claims are not identical, they are

not patentably distinct from each other because all the claimed limitations, i.e., first and second

ports, first and second data filters, first and second modems, at least one data connector, a

multiport unit, first and second analog filters, and at least one analog connector, are transparently

found in U.S. Patent No. 6,690,677 and U.S. Patent No. 6,549,616 with obvious wording

variations.

5. Claims 20-54 are provisionally rejected under the judicially created doctrine of

obviousness-type double patenting as being unpatentable over claims 1-16 of copending

Application No. 10/412,251. Although the conflicting claims are not identical, they are not

patentably distinct from each other because all the claimed limitations, i.e., first and second

ports, first and second data filters, first and second modems, at least one data connector, a

multiport unit, first and second analog filters, and at least one analog connector, are transparently

found in U.S. Patent No. 6,690,677 and U.S. Patent No. 6,549,616 with obvious wording

variations.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting

claims have not in fact been patented.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. Bingel et al. (US PAT. 6,744,883) discloses a filter system to suppress interference

imposed upon a frequency-division multiplexed channel (abstract).
